Consolidating and Developing Benchmarking Datasets for the Nepali Natural Language Understanding Tasks. ACL-IJCNLP, 2025. [DOI] 4. Thapa P, Nyachhyon J , Sharma M, Bal BK. Development of Pre-Trained Transformer-based Models for the Nepali Language. (CHiPSAL) COLING, 2025. (<i>Joint First Author</i>) [DOI]	
TALKS & PRESENTATIONS	• <i>Consolidating and Developing Benchmarking Datasets for the Nepali Natural Language Understanding Tasks, ACL-IJCNLP 2026</i> , Conference Presentation. • <i>Development of Pre-Trained Transformer-based Models for the Nepali Language, COLING 2025</i> , Oral Presentation.	
RESEARCH EXPERIENCE	Manifold Research Group <i>Open Science Research Fellow</i> • Software Control Agents: Built and benchmarked LLM-driven software control agents on Mind2Web, conducting systematic comparisons of models (e.g., UI-TARS, Qwen2.5-VL) in complex, real-world web environments. • Trajectory Generation: Developed trajectory generation and perturbation pipelines for training and stress-testing agents, enabling robustness evaluation under distribution shifts and unseen task variants. • Analysis of Agent Behavior: Conducted systematic analysis of agent behavior, focusing on spatial reasoning, tool use, and action grounding failures.	USA (Remote) 2025.10 - 2026.04
	Information and Language Processing Research Lab (ILPRL) <i>Research Assistant, Supervisor: Dr. Bal Krishna Bal</i> • Benchmarking: Led the design and release of the NLUE benchmark (12 Nepali NLU tasks), establishing a standardized evaluation suite for low-resource LLMs. • Nepali Corpus for Foundation Models: Assembled and processed 27.5GB Nepali text corpus addressing data scarcity. • Pre-Training and Analysis: Pretrained BERT/RoBERTa/GPT-2 with instruction tuning, achieving SOTA on Nep-gLUE; conducted comparative evaluation and error analysis.	Kavre, Nepal 2024.07 - 2025.12

Institute for Research and Innovation in Intelligent Systems (IRIIS)	Nepal
Co-founder & Researcher	2024.12 - Present

- **Reasoning Models:** Developing planning & reasoning datasets to understand model capabilities in multi-agent environments.
- **Education:** Create visual educational materials on probability theory and CUDA programming, inspired by 3Blue1Brown.

Modulo Research Ltd.	Cambridge, UK (Remote)
Research Intern, Supervisor: Dr. Gabriel Recchia	2024.06 - 2024.08

- **Automated Analysis:** Automated analysis of 20-minute screen recordings, refining scene change detection with 80% precision via URL change tracking and LLM-based event and detail extraction of video frames.
- **LLM Alignment Evaluation:** Conducted scalable oversight experiments by comparing LLM outputs with human annotations to assess and improve intent alignment.

PROFESSIONAL EXPERIENCE

Insyde AI	Maryland, USA (Remote)
AI Developer	2025.01 - Present

- **LLM Agent Systems:** Developed production-grade LLM agents for financial workflows with multi-step reasoning, tool use, and automated decision pipelines.
- **MCP & Memory:** Integrated Model Context Protocol (MCP) servers, external tools, and persistent memory for context-aware assistants.
- **Workflow Automation:** Reduced customer processing time by >90%, increasing operational throughput by over 10x.

Virtly IT & Business Solutions Sarl (ICEBRKR)	Geneva, Switzerland (Remote)
ML Engineer	2024.03 - 2024.09

- **Finetuning:** Finetuned BART, T5, Pegasus for summarization (ROUGE-L > 50); Phi-3 for task prioritization system.
- **Scheduling Algorithm:** Built an algorithm to resolve online meeting scheduling conflicts by proposing optimal time slots.

LogicTronix	Lalitpur, Nepal
ML/CV Engineer	2023.06 - 2024.03

- **3D Object Detection & Tracking:** Integrated and optimized SFA3D into ADAS stack, achieving real-time 3D object detection and tracking on embedded platforms.
- **Model Quantization:** Reduced model size by over 60% through quantization for Xilinx FPGA deployment, improving edge inference efficiency.

ACADEMIC EXPERIENCE

Herald College Kathmandu, University of Wolverhampton	Kathmandu, Nepal
Assistant Lecturer	2026.03 - Present

- **Teaching Delivery:** Conducted tutorial and workshop sessions on machine learning and deep learning topics, including Perceptrons, Softmax Regression, CNNs, Autoencoders, and RNN/Seq2Seq models, integrating mathematical concepts with hands-on coding.
- **Practical Guidance:** Designed and supervised implementation-based learning (e.g., MNIST and Devanagari datasets), guiding both group-based projects and individual technical work with emphasis on correct methodology and consistency.

VOLUNTEER

PyTorch Tester & Mentor

DeepLearning.AI

Remote
2025.08 - Present

- **Bug Hunting:** Test courses that includes lectures, quizzes, labs and assignments for general and code specific bugs, and report them.
- **Mentorship:** Guide learners on PyTorch and deep learning, resolving quiz conflicts, clarifying doubts, and supporting forum discussions in DeepLearning.AI courses.

Instructor & Event Organizer

Advanced College of Engineering and Management

Kathmandu, Nepal
2022.03 - 2023.01

- **Workshop:** Led hands-on workshops mentoring 100+ peers and juniors in programming and ML fundamentals.
- **Curriculum Development:** Developed a structured curriculum covering Python (basic to advanced) and introductory Machine Learning.
- **Techfest:** Organized international zonal qualification from Nepal for IITB Techfest.
